---

## PRINCE2®; PRACTITIONER TRAINING COURSE OUTLINE

---

### FOREWORD

At the end of this course, delegates in Hong Kong will be prepared for the PRINCE2® practitioner exam. The purpose of the Practitioner qualification is to confirm whether the candidate has achieved sufficient understanding of how to apply and tailor PRINCE2® in a scenario situation. A successful Practitioner candidate should, with suitable direction, be able to start applying the method to a real project, but may not be sufficiently skilled to do this appropriately for all situations. Their individual project management expertise, complexity of the project and the support provided for the use of PRINCE2® in their work environment will all be factors that impact what the Practitioner can achieve.

---

### OUTCOMES

In this course you will:

- Understand the relationships between the roles, management products, principles, themes, techniques and processes
  - Be able to apply the principles, themes and processes to a project
  - Be able to create and assess management products.
- 

### MODULES

#### Lesson 1: DAY 1

- Understanding the examination format
- Tips and tricks for answering the Practitioner
- Questions
- Review of PRINCE2®
- Practice questions under examination conditions
- Review of answers

#### Lesson 2: DAY 2

- Practitioner examination only
-
