1.0 DAY COURSE

Access 2016 is the database application in the Microsoft Office suite. A relational database application such as Microsoft Office Access 2016 can help you and your organisation collect and manage large amounts of data. The PD Training Microsoft Access 2016 Introduction training course will show the users how it can be applied as a personal data management tool (for your use alone) or as a construction set to develop applications for an entire department or organisation.

This hands-on training workshop is available now throughout Hong Kong, including Central and also via instructor-led online training.
