1.0 DAY COURSE

OneNote 2016 is Microsoft's note-taking and organisational application. The latest version incorporates a refined page hierarchy, better-searching options, automatic links to pasted content, task integration with Outlook, and a variety of new sharing options to make working with others easier.

This OneNote 2016 course, delivered by PD Training, covers different features of the interface, shows users how to print, covers some simple scenarios, and examines the basics of formatting. Learn key skills like creating a new OneNote notebook, customising the interface, entering information into OneNote from a variety of sources and using OneNote's collaboration tools.

This dynamic training course is available now throughout Hong Kong including Central.
